

## Refrigeration Monitoring Simplified

Two options to help you meet the FDA's Food Safety Modernization Act (FSMA).

### Option 1: Temperature Sensor

Easy install, low-cost solution that fully integrates with the CyntrX fleet tracking platform. View temperature reads in your activity reports and receive optional alerts via email or text.

#### Alerts: Text or Email

Receive an email or text alert if temperature reads above or below your determined threshold.

#### Platform Integration

Track current temperature reading and historical temperature readings in the CyntrX platform.

#### Customizable

Real-time temperature readings update at customizable intervals -- 30 seconds to every 5 minutes.

Learn more about CyntrX Refrigeration Monitoring Solutions.

Call (920) 338-0479 or visit [www.cyntrx.com](http://www.cyntrx.com).

## Option 2: An Integrated Solution

Get other critical data, beyond temperature readings, with these two vendor-specific refrigeration monitoring integrations.

### Reporting: Fully Integrated

See below for full list of data available directly in the CyntrX platform.

### Backed by a Trusted Partner

Our clients appreciate our straightforward pricing and dedicated customer support.

## Available Data for Integrated Solutions

Compartment Set Point

Compartment Temperature

Ambient Air Temperature

Status

Mode of Operation

Engine State and Mode

Engine Speed

Alarm Status

Battery Voltage

Total Engine Hours

Total Standby Hours

Total Switch-on Hours

*\*Note that ThermoKing requires purchase of the iBox equipment.*
